

Social Value Statement

At ANTA Education, our approach to creating the maximum social value in the communities where we operate is underpinned by our mission and guiding principles – with a key focus on improving outcomes for the adult learners that access our programmes.

Working primarily in the funded training sector, we are mindful that we operate in accordance with The Public Services (Social Value) Act 2012 which requires public authorities to consider economic, social and environmental wellbeing in connection with public services and commissioning contracts. It is our belief that our value to communities lies in not only the provision of improved and efficient service delivery, but also through investing and making a social impact in the local communities where we work.

Our social goals are based around 4 distinct areas and many initiatives are driven by our educational proclivity and company values:

- Building and sustaining excellent relationships
- Valuing people and their differences
- Challenging ourselves and each other
- Protecting reputations
- Being trusted to deliver great services
- Striving to deliver excellent services

Through collaboration with our own employees, customers, suppliers and other stakeholders we are committed to enhancing both the lives of our staff and those within our wider community by focusing on:

- Community Engagement
- Staff Wellbeing
- Local Economy, Employment & Skills
- Environment

Our primary business and any associated partners are encouraged to adhere to the social values. Only with an mindset of supporting the wider community and all stakeholders can our provision be accessible and beneficial to all.
